

# Commercial Autonomous Vacuum System

## Better clean. Better health. Better bottom line.

# FR 06

A clean and well-maintained facility is an important factor in keeping happy and healthy staff, residents, and guests. But the most critical component in site upkeep—vacuuming—is time-consuming, expensive, injury-prone, and tedious.

What if we could sustain and improve our standard of living without so much expense and human toil?

**Enter the Friendly Frog**—an autonomous vacuum system custom-mapped to your facility, guaranteeing 100% coverage each time you use it.

### Affordable

Available on a monthly subscription.

### Dependable

We offer a service guarantee. And because it is **100% designed, built and maintained in the USA**, our supply chain is dependable.

### Simple

Easy-to-use app-based interface.

### Self-driving

Using lidar technology—think of it as the Frog's eyes and brain—the Frog creates a cleaning map **UNIQUE** to your facility.

### Technical specifications

**Dimension** 44 in x 26 in x 37 in

**Weight** 200 lbs

**Run time** 8 hours continuous vacuuming

**Clearance** Zero-clearance edging, adjustable brush

**Filter** HEPA

**Average cleaning productivity** 4500 sqft/hr

**Waste capacity** 4-Gallon BAGLESS bin

### One-time setup

The robot is custom-programmed to clean every square foot of your facility.

### Daily operations

- Unplug the robot's charger.
- Select a cleaning routine and press the start button.
- At the end of the cycle, stow and charge the robot.
- Empty the bin as necessary.

### Simple user interface

Start, stop, and pause a cleaning routine from anywhere, any time.

### Safe

Operator can take over control at any moment.
